

Benzapon Easy

Special spray-on agent for Jet-Clean machinery and equipment

- Properties:**
- specially adapted to the requirements of cleaning machines using spray-on technology
 - can be rinsed out residue-free in hydrocarbon solvent
 - effectively removes odours such as sweat and urine
 - can easily be used outside the machine

Application: **Benzapon Easy** is sprayed undiluted onto garments that are then cleaned in the Jet- Clean machine. To obtain optimal rinsing results select a programme in which the garments are sufficiently saturated with solvent. This avoids the formation of ring marks.

If any local pre-spotting is carried out additionally, make sure that the spotting agent is thoroughly rinsed out and the garments are blown dry before treatment in the Jet-Clean machine.

Garments that have been sprayed with **Benzapon Easy** should then be cleaned in the machine after a reaction time of at most 30 minutes. Allowing the product to react for substantially longer periods can lead to material damage. Care must be taken when treating delicate garments. In cases of doubt conduct a hem or seam test first.

Dosing automatically through the cleaning machine **Benzapon Easy** should be diluted with water (approx. 1:5).

Technical Data:

Density 20 °C (68 °F)	1.01 g/ml
pH-value	6.8 - 7.5

Hints:

Storage

Store tightly closed in a cool place. The product can be stored for at least 24 months in its original sealed packing.
