

Lizerna Bleach

Liquid active bleaching agent containing chlorine

- Properties:**
- highly concentrated, fast-acting bleaching
 - good dosing possibility
 - to remove spots and for intensive bleaching
 - for all machines and all degrees of hardness
 - usable cold and warm during the pretreatment or for intermediate bleaching

Application: Recommended dosage for machine wash:

1 - 3 ml/kg dry garments (0.15 - 0.45 fl. oz/10 lbs) for all washing machines and all degrees of hardness; temperature max. 60 °C (140 °F); washing time at least 10 minutes. Dose appropriate single-purpose or sole washing agents (without oxidation bleach) to the respective stage of washing programme.

For spot removal and intensive bleaching use 5 ml/kg [Lizerna Bleach](#) (0.75 fl. oz/10 lbs) up to 60 °C (140 °F). Time of reaction approx. 30 minutes. Rinse out the excess of chlorine with appropriate additives (f.e. multi-purpose detergent containing oxygen bleach).

Do not combine [Lizerna Bleach](#) with acids or acid containing products.

Technical Data:

Density 20 °C (68 °F)	1.23 g/cm ³
pH-value (1%)	11.0 - 12.0

Hints:

Storage

Store cool and protected from direct sunlight; after partial taking out close the packing unit airtight again.

The product can be stored for at least 6 months in its original sealed packing.
