

Lizerna POX

Stabilized oxygen bleaching agent in powder form

- Properties:**
- highly concentrated, low application quantity
 - provides a pleasant, fresh odour
 - ideal for coffee, tea, fruit and wine stains
 - can be combined with all of our washing agents
 - can be used as antichlorine

Application: 3 - 5 g/l washing liquor (0.41 - 0.68 oz/gal)
The highest effectivity of **Lizerna POX** is reached when it is applied at temperatures over 60 °C (140 °F). At lower temperatures the concentration applied should be increased or the washing time should be prolonged.

Lizerna POX is a bleaching powder based on oxygen with a fresh odour. Especially suitable for removing stains like coffee, tea, fruits, wine and suchlike quickly.
